Profile

I'm a junior web developer with a long background in higher education systems. I like making things simpler, whether that's building clean, functional apps or fixing complicated workflows for students and staff. I'm skilled in both code and campus systems (Banner, DegreeWorks, Laserfiche), and I enjoy collaborating with teams to solve problems, improve tools, and make digital experiences more user-friendly.

Tech Skills

Frontend: HTML, CSS, JavaScript, React, Angular, TypeScript

Backend: Python, Django, Node.js, Express

Databases: PostgreSQL, MongoDB

Other Tools: Git/GitHub, Firebase, APIs, Bootstrap, Chart.js, Figma, Chrome DevTools

Higher Ed Systems: Banner, DegreeWorks, Laserfiche (forms, workflows, records management), CRM tools

Projects

- **Recipe App** – Django/PostgreSQL app with recipe management, user accounts, and data charts.
 - **Angular myFlix** – Responsive movie app with search and favorites (Angular/TypeScript).
 - **Chat App** – Mobile app for messaging, media, and location sharing (React Native/Firebase).
 - **Meet App** – PWA with Google Calendar API, offline support, and data visualizations (React).
 - **MyFlix (MERN)** – Full-stack movie app with user profiles and JWT auth.
 - **Pokédex** – Fun vanilla JS project for exploring Pokémon data.
-

Experience

Oregon State University – *Functional Systems Coordinator / Business Analyst*

2022 – 2024 | Corvallis, OR

- Tested and rolled out Banner Student upgrades and access requests.
- Created process maps, training docs, and testing plans to support system users.
